

PRODUCT BULLETIN: PSP100-082

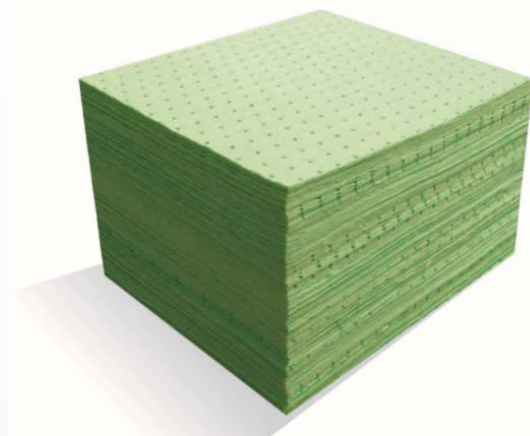

Sorbent Pad, Dimpled, Fine Fiber/Meltblown/Fine Fiber, Green, Hazmat, 15" x 18", Heavy Weight, 100 per bale

Dimpled absorbent mats combine a low-linting surface and cost savings. They absorb hydrocarbon-based fluids and repel water. These types of pads are most commonly used for everyday maintenance applications inside manufacturing/production facilities. A perforation helps reduce waste.

Fine fiber polypropylene is a soft, super-absorbent fiber that resembles tissue paper. It's most common application is for air and liquid filtration, but we use it as a covering for various absorbent composites. We thermally bond a thin layer to each side of our standard, coarse fiber, meltblown polypropylene. These composites absorb quickly, remove the sheen from the plant floor, and they also grip the floor.

PSP100-082 Product Description:

- Hazmat / Universal Pad
- 15" x 18", 11 lbs/bale
- Heavy Weight
- Fine Fiber Composite
- 100 pads per bale, 36 pallets per skid
- Absorption: 20 USG/bale (75 L)
- Dimpled and Perforated to reduce waste

* At the time of manufacturing. Handling may change these properties.
