P2 Spill Pallet, High Load Capacity, With Drain **53" x 29" x 16.5" (1346.2mm x 736.6mm x 419.1mm)**

The Ultra-Spill Pallet P2 with a drain is a 66-gallon polyethylene sump with deck surface with room to store two 55-gallon drums. In the event of a leak, fluid is contained in the sump, preventing contamination to surrounding environment. The Ultra-Spill Pallet is specially constructed to support heavy loads and designed to be easily used and transported. Its 100% Polyethylene construction makes it compatible with a wide range of chemicals, while its low-rise walls give more accessibility for pouring. Helps meet spill containment regulations for up to four drums and comply with SPCC and EPA spill containment requirements.

Colour: Black / Yellow

Material: PE

Weight (approx.): 63 lb (28.6 kg)

Size: 53" x 29" x 16.5" (1346.2 mm x 736.6 mm x 419.1 mm)

Containment Capacity: 66 USG (249.8), Load Capacity: 3000 lbs (1365 kg)
